## GRAPE CRUSH REPORT

Information contained in this Report was supplied by processors to fulfill the reporting requirements of Section 55601.5 of the Food and Agriculture Code.

The Preliminary Grape Crush Report includes all grape tonnage crushed during the 1985 season. It also includes purchase tonnage and pricing information for grapes with final prices prior to January 10, 1986. The Final Grape Crush Report, to be released March 10, 1986, will include additional purchased tonnage and prices from reference price contracts that were in effect prior to January 1, 1977 and will be priced after January 10, 1986. The Final Report may also contain any late reports or corrections to the Preliminary Report.

Detail of the crushed tonnage, degrees Brix and weighted average prices are reported by grape type and variety as well as by grape pricing district. The 17 districts refer to the area in which the grapes were grown as defined in the Administrative Code.

All grapes crushed in 1985 reached 2,840,545 tons, 10 percent larger than last year's crush, but down 9 percent from the record high 1982 crush. The crush of raisin type grapes totaled 558,089 tons, down 5 percent from the previous year. Thompson Seedless, the major raisin variety, was down 6 percent to 505,929 tons. Table varieties totaled 215,130 tons crushed, up 26 percent from last year. An increase of 24 percent in the Tokay variety, with 150,305 tons, was reported. All wine varieties crushed totaled 2,067,326 tons, up 13 percent from 1984. Black varieties, with 859,764 tons, were up 9 percent and white varieties totaled 1,207,562 tons for an increase of 17 percent. White wine varieties accounted for 58 percent of the total wine varieties crushed compared with 57 percent in 1984 and 55 percent in 1983. This is the third year the crush of all white varieties has exceeded the quantity of all black varieties crushed. The major white wine variety crushed was French Colombard with 585,393 tons, representing 48 percent of the total white wine varieties crushed. Grenache was the black wine variety with the largest crush totaling 126,683 tons, up 5 percent from last year. Grenache represented 15 percent of the total black wine varieties crushed. Barbera came in second accounting for 15 percent of the total black wine varieties crushed with 125,386 tons.

The weighted average price per ton for all grapes purchased for wine, concentrate, juice, vinegar and beverage brandy was \$155.82, down 9 percent from the 1984 price of \$171.79. Weighted average price for raisin type grapes was \$74.52 per ton, down \$3.83; table type \$131.19 per ton, up \$1.64; and wine type \$179.18 per ton, down \$22.87. White wine varieties averaged \$184.79 per ton, down \$35.43 from 1984, while black wine varieties averaged \$170.67 per ton, down \$5.85 from last year. The weighted average degrees Brix for all grapes crushed was 20.7 and averaged 20.6 for all grapes purchased.

## EXPLANATION OF TABLES

Table 1 is a summary of the 1985 crop State totals by grape type and varieties that are shown in detail by grape pricing districts in Tables 2 through 6. State totals and averages for 1984 are shown for comparison.

Table 2 includes over-the-scale fresh tonnage of all grapes crushed by California processors from the 1985 crop. Over-the-scale fresh weight tonnage includes materials other than grapes (MOG) and defects. This table is broken down by the 17 grape pricing districts and by variety. State totals for 1984 are shown for comparison. Crushed tonnage includes all grapes crushed whether: grown and crushed by processors; purchased and crushed by processors; crushed by cooperatives, juice manufacturers, etc.; or crushed for others, including growers.

Table 3 shows the weighted average degrees Brix for all grapes crushed (Table 2) by California processors from the 1985 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 1984 are shown for comparison.

Table 4 includes net weight fresh tonnage of all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy by California processors from the 1985 crop. Net weight fresh tonnage does not include material other than grapes (MOG) and defects or other weight adjustments deducted from gross weight. The purchased tonnage is reported by variety and grape pricing districts. State totals for 1984 are shown for comparison. Table 4 does not include tonnage purchased as distilling material other than beverage brandy, this is shown in Table 7. Prices for all tonnage shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Table 5 shows the weighted average degrees Brix for all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy (Table 4) by California processors from the 1985 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 1984 are shown for comparison. Table 5 does not include degrees Brix of tonnage purchases as distilling material other than beverage brandy, this is shown in Table 7. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Table 6 gives the weighted average price per ton, delivered basis, of all tonnage purchased for wine, concentrate, juice, vinegar, and beverage brandy (Table 4) by California processors from the 1985 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 1984 are shown for comparison. Table 6 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in Table 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Weighted average prices reflect final prices through January 10, 1986 and includes any Brix adjustments, bonuses or allowances. Prices from some reference price contracts written prior to January 1, 1977 may be included if settled by January 10, 1986. Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling allowances for delivery outside the area.

The following example indicates the method used for calculating weighted averages:

| Variety   | Dist. | Total Grapes Crushed     |                             | Final Prices of Grapes Purchased from Grower(s) |                             |                                |                         |  |  |  |   |    |    |              |              | Total Paid<br>(Column 5 X B / C) | Wtd. Average Price Per Ton<br>15 |
|-----------|-------|--------------------------|-----------------------------|---|-----------------------------|--------------------------------|-------------------------|--|--|--|---|----|----|--------------|--------------|----------------------------------|----------------------------------|

|           |       |                          |                             |   |                             |                                |                         |  |  |  |   |    |    |              |              |                                  |                                  |
| Column →  |       | 3                        | 4                           | 5   | 6                           | A                              | 7                       | 8  | 9  | 10   | 12  | 13 | 14 | B            | C            |                                  |                                  |
| Zinfandel | 1     | 100.0                    | 20.1                        | 100.0   | 20.1                        | 2,010.00                       | \$ 450.00               | 25   | 19   | + or - 10%   | 22  | 24 | 20 | \$ 364.50    | \$ 36,450.00 | \$                               |                                  |
| Zinfandel | 1     | 20.5                     | 21.3                        | 20.5  | 21.3                        | 436.65                         | 450.00                  | 25   | 19   | + or - 10%   | 22  | 24 | 20 | 418.50       | 8,579.25     |                                  |                                  |
| Zinfandel | 1     | 10.6                     | 22.5                        | 10.6  | 22.5                        | 249.10                         | 450.00                  | 25   | 19   | + or - 10%   | 22  | 24 | 20 | 517.50       | 5,485.50     |                                  |                                  |
|           |       | 131.1                    | 20.6                        | 131.1   | 20.6                        | 2,695.75                       |                         |  |  |  |   |    |    | \$ 50,514.75 | \$ 385.31    |                                  |                                  |

Columns 4 and 6 were obtained by dividing the total Net Fresh Tons, (Columns 3 and 5) into the total Brix of these same tons (Column A):  $\frac{2,695.75}{131.1} = 20.6$

Column 15 was obtained by dividing the total Net Fresh Tons, (Column 5) into the total dollars paid for these same tons (Column C):  $\frac{\$50,514.75}{131.1} = \$385.31$

Table 7 shows all grape tonnage purchased as distilling material other than beverage brandy by California processors from the 1985 crop. The tonnage, weighted average degrees Brix and price per ton are shown by grape type and variety. State totals and averages for 1984 are given for comparison.

Table 8 shows base prices paid to growers by variety, by Brix adjustment factors, and percent of variety tonnage. The weighted average of all base prices by variety is not shown in this publication, but is available in summary form by contacting the Federal-State Market News Service, Sacramento, California.

The Brix adjustment factors determine adjustments to base prices to compensate for sugar variations. In this report, adjustments are expressed in dollars per ton, or percent of base price per degree variance from the established Brix base. Occasional lots are traded on price per degree Brix as delivered.

a/ See code descriptions beginning on page 42.

b/ Percentage total by variety will not necessarily add to 100.00 due to rounding.

c/ Price basis per degree Brix.

d/ Less than .005 percent.

Table 8 - Supplement

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most wineries, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the winery. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

## GRAPE CRUSH REPORT

Information contained in this Report was supplied by processors to fulfill the reporting requirements of Section 55601.5 of the Food and Agriculture Code.

The Preliminary Grape Crush Report includes all grape tonnage crushed during the 1986 season. It also includes purchased tonnage and pricing information for grapes with final prices prior to January 10, 1987. The Final Grape Crush Report, to be released March 10, 1987, will include additional purchased tonnage and prices from reference price contracts that were in effect prior to January 1, 1977 and will be priced after January 10, 1987. The Final Report may also contain any late reports or corrections to the Preliminary Report.

Detail of the crushed tonnage, degrees Brix and weighted average prices are reported by grape type and variety as well as by grape pricing district. The 17 districts refer to the area in which the grapes were grown as defined in the Administrative Code.

All grapes crushed in 1986 totaled 2,792,503 tons, 2 percent less than last year's crush and 10 percent below the record high 1982 crush. The crush of raisin type grapes totaled 504,832 tons, down 10 percent from the previous year. Thompson Seedless, the major raisin variety, was down 12 percent to 445,144 tons. Table varieties totaled 233,843 tons crushed, up 9 percent from last year. A decrease of 6 percent in the Tokay variety crush was more than offset by increases in other varieties. All wine varieties crushed totaled 2,053,828 tons, down 1 percent from 1985. Black varieties, with 762,189 tons, were down 11 percent and white varieties totaled 1,291,638 tons for an increase of 7 percent. White wine varieties accounted for 63 percent of the total wine varieties crushed compared with 58 percent in 1985 and 57 percent in 1984. This is the fourth consecutive year the crush of all white varieties has exceeded the quantity of all black varieties crushed. The major white wine variety crushed was French Colombard with 677,594 tons, representing 52 percent of the total white wine varieties crushed. Zinfandel was the black wine variety with the largest crush totaling 143,306 tons, up 16 percent from last year. Zinfandel represented 19 percent of the total black wine varieties crushed. Grenache came in second accounting for 14 percent of the total black wine varieties crushed with 103,053 tons.

The weighted average price per ton for all grapes purchased for wine, concentrate, juice, vinegar and beverage brandy was \$182.62, up 13 percent from the 1985 price of \$160.95. The overall price rise was mainly caused by increased prices for raisin and black wine type grapes. Weighted average price for raisin type grapes was \$104.99 per ton, up \$30.25; table type \$132.87 per ton, up \$1.69 and wine type \$203.79 per ton, up \$18.78. White wine varieties averaged \$194.41 per ton, up \$2.66 from 1985, while black wine varieties averaged \$220.76 per ton, up \$45.84 from last year. The weighted average degrees Brix for all grapes crushed was 19.9 and averaged 19.8 for all grapes purchased.

## EXPLANATION OF TABLES

Table 1 is a summary of the 1986 crop State totals by grape type and varieties that are shown in detail by grape pricing districts in Tables 2 through 6. State totals and averages for 1985 are shown for comparison.

Table 2 includes over-the-scale fresh tonnage of all grapes crushed by California processors from the 1986 crop. Over-the-scale fresh weight tonnage includes materials other than grapes (MOG) and defects. This table is broken down by the 17 grape pricing districts and by variety. State totals for 1985 are shown for comparison. Crushed tonnage includes all grapes crushed whether: grown and crushed by processors; purchased and crushed by processors; crushed by cooperatives, juice manufacturers, etc.; or crushed for others, including growers.

Table 3 shows the weighted average degrees Brix for all grapes crushed (Table 2) by California processors from the 1986 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 1985 are shown for comparison.

Table 4 includes net weight fresh tonnage of all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy by California processors from the 1986 crop. Net weight fresh tonnage does not include material other than grapes (MOG) and defects or other weight adjustments deducted from gross weight. The purchased tonnage is reported by variety and grape pricing districts. State totals for 1985 are shown for comparison. Table 4 does not include tonnage purchased as distilling material other than beverage brandy, this is shown in Table 7. Prices for all tonnage shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Table 5 shows the weighted average degrees Brix for all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy (Table 4) by California processors from the 1986 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 1985 are shown for comparison. Table 5 does not include degrees Brix of tonnage purchased as distilling material other than beverage brandy, this is shown in Table 7. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Table 6 gives the weighted average price per ton, delivered basis, of all tonnage purchased for wine, concentrate, juice, vinegar, and beverage brandy (Table 4) by California processors from the 1986 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 1985 are shown for comparison. Table 6 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in Table 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Weighted average prices reflect final prices through January 10, 1987 and includes any Brix adjustments, bonuses or allowances. Prices from some reference price contracts written prior to January 1, 1977 may be included if settled by January 10, 1987. Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling allowances for delivery outside the area.

The following example indicates the method used for calculating weighted averages:

| Variety   | Dist. | Total Grapes Crushed           |                           | Final Prices of Grapes Purchased from Grower(s) |                           |                              |                          |  |  |                        |      |      |  |              |              |    | Total Paid<br>(Column 5 X B) | Wtd. Average Price<br>(Column 5 X C)<br>Per Ton |
|-----------|-------|--------------------------------|---------------------------|---|---------------------------|------------------------------|--------------------------|--|--|------------------------|------|------|--|--------------|--------------|----|------------------------------|---|
|           |       | Over the Scale<br>Brix<br>Tons | Wtd. Avg. Degrees<br>Brix | Net Weight<br>Fresh<br>Tons                     | Wtd. Avg. | Zinfandel | 1     | 100.0                          | 20.1                      | 100.0   | 20.1                      | 2,010.00                     | \$ 450.00                | 25                                     | 19   | + or - 10%             | 22   | 24   | 20   | \$ 364.50    | \$ 36,450.00 | \$ |                              |   |
| Zinfandel | 1     | 20.5                           | 21.3                      | 20.5  | 21.3                      | 436.65                       | 450.00                   | 25                                     | 19   | + or - 10%             | 22   | 24   | 20   | 418.50       | 8,579.25     |    |                              |   |
| Zinfandel | 1     | 10.6                           | 23.5                      | 10.6  | 23.5                      | 249.10                       | 450.00                   | 25                                     | 19   | + or - 10%             | 22   | 24   | 20   | 517.50       | 5,485.50     |    |                              |   |
|           |       | 131.1                          | 20.6                      | 131.1   | 20.6                      | 2,695.75                     |                          |  |  |                        |      |      |  | \$ 50,514.75 | \$ 385.31    |    |                              |   |

Columns 4 and 6 were obtained by dividing the total Net Fresh Tons, (Columns 3 and 5) into the total Brix of these same tons (Column A):  $\frac{2,695.75}{131.1} = 20.6$

Column 15 was obtained by dividing the total Net Fresh Tons, (Column 5) into the total dollars paid for these same tons (Column C):  $\frac{\$50,514.75}{131.1} = \$385.31$

Table 7 shows all grape tonnage purchased as distilling material other than beverage brandy by California processors from the 1986 crop. The tonnage, weighted average degrees Brix and price per ton are shown by grape type and variety. State totals and averages for 1985 are given for comparison.

Table 8 shows base prices paid to growers by variety, by Brix adjustment factors, and percent of variety tonnage. The weighted average of all base prices by variety is not shown in this publication, but is available in summary form by contacting the Federal-State Market News Service, Sacramento, California.

The Brix adjustment factors determine adjustments to base prices to compensate for sugar variations. In this report, adjustments are expressed in dollars per ton, or percent of base price per degree variance from the established Brix base. Occasional lots are traded on price per degree Brix as delivered.

b/ Percentage total by variety will not necessarily add to 100.00 due to rounding.

d/ Less than .005 percent.

Table 8 - Supplement

## BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

## GRAPE CRUSH REPORT

### OVERVIEW

Information contained in this Report was supplied by processors to fulfill the reporting requirements of Section 55601.5 of the Food and Agriculture Code.

The Preliminary Grape Crush Report includes all grape tonnage crushed during the 1987 season. It also includes purchased tonnage and pricing information for grapes with final prices prior to January 10, 1988. The Final Grape Crush Report, to be released March 10, 1988, will include additional purchased tonnage and prices from reference price contracts that were in effect prior to January 1, 1977 and will be priced after January 10, 1988. The Final Report may also contain any late reports or corrections to the Preliminary Report.

Detail of the crushed tonnage, degrees Brix and weighted average prices are reported by grape type and variety as well as by grape pricing district. The 17 districts refer to the area in which the grapes were grown as defined in the Administrative Code. A district map is located on the inside of the front cover.

### GRAPE PRICES CONTINUE TO RISE

California grape growers have received an average price of \$217.27 per ton for grapes crushed in 1987, up 17 percent from the 1986 average price. The average price has rebounded by 35 percent since 1985. The 1987 price is the second highest on record -- only surpassed by the \$249.40 price paid in 1981.

The 1987 crush totaled 2,485,548 tons, down 11 percent from the 1986 crush and 14 percent less than the record-large 1982 harvest. White wine varieties continue to account for a larger share of all grapes crushed while red wine varieties decline.

# LEADING VARIETIES CRUSHED

## 1987 CROP

PERCENT OF TOTAL CRUSH

# TOTAL TONS CRUSHED

## WHITE WINE VARIETIES GAIN

SOURCE: GRAPE CRUSH REPORT

### LEADING GRAPE VARIETIES

French Colombard, the most widely planted grape variety in California, continued its dominance with 25 percent of the crush volume. Thompson Seedless, a raisin variety grape, remained in second place with 16 percent of the total crush. The remaining top ten varieties were all wine varieties except the seventh largest — Flame Tokay which falls into the table grape classification.

Grapes produced in District 4 (Napa County) received the highest average price of \$825.78 per ton. District 3 (Sonoma and Marin counties) received the second highest return of \$624.40 per ton. Of the grapes grown Statewide, Chardonnay grapes received the highest average price of \$915.78 per ton. The average price paid for Cabernet Sauvignon grapes was \$624.08 per ton. The 1987 Thompson Seedless price was \$122.49, up 17 percent from the \$104.84 price paid last year. The crush volume of Thompson Seedless grapes declined by 11 percent from 1986 to 397,832 tons.

The Final Grape Crush Report, which will contain price updates on reference price contracts for some wineries, will be issued on March 10, 1988.

## EXPLANATION OF TABLES

Table 1 is a summary of the 1987 crop State totals by grape type and varieties that are shown in detail by grape pricing districts in Tables 2 through 6. State totals and averages for 1986 are shown for comparison.

Table 2 includes over-the-scale fresh tonnage of all grapes crushed by California processors from the 1987 crop. Over-the-scale fresh weight tonnage includes materials other than grapes (MOG) and defects. This table is broken down by the 17 grape pricing districts and by variety. State totals for 1986 are shown for comparison. Crushed tonnage includes all grapes crushed whether: grown and crushed by processors; purchased and crushed by processors; crushed by cooperatives, juice manufacturers, etc.; or crushed for others, including growers.

Table 3 shows the weighted average degrees Brix for all grapes crushed (Table 2) by California processors from the 1987 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 1986 are shown for comparison.

Table 4 includes net weight fresh tonnage of all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy by California processors from the 1987 crop. Net weight fresh tonnage does not include material other than grapes (MOG) and defects or other weight adjustments deducted from gross weight. The purchased tonnage is reported by variety and grape pricing districts. State totals for 1986 are shown for comparison. Table 4 does not include tonnage purchased as distilling material other than beverage brandy, this is shown in Table 7. Prices for all tonnage shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Table 5 shows the weighted average degrees Brix for all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy (Table 4) by California processors from the 1987 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 1986 are shown for comparison. Table 5 does not include degrees Brix of tonnage purchased as distilling material other than beverage brandy, this is shown in Table 7. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Table 6 gives the weighted average price per ton, delivered basis, of all tonnage purchased for wine, concentrate, juice, vinegar, and beverage brandy (Table 4) by California processors from the 1987 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 1986 are shown for comparison. Table 6 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in Table 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Weighted average prices reflect final prices through January 10, 1988 and includes any Brix adjustments, bonuses or allowances. Prices from some reference price contracts written prior to January 1, 1977 may be included if settled by January 10, 1988. Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling allowances for delivery outside the area.

The following example indicates the method used for calculating weighted averages:

| Variety   | Dist. | Total Grapes Crushed |                        | Net Weight Fresh Tons | Wtd. Avg. Degrees Brix | Final Prices of Grapes Purchased from Grower(s) |                    |                        |  |                        |      |      |  |           |    |              |           | Total Paid (Column 5 X B) | Wtd. Average Price Per Ton |
|-----------|-------|----------------------|------------------------|-----------------------|------------------------|---|--------------------|------------------------|--|------------------------|------|------|--|-----------|----|--------------|-----------|---------------------------|----------------------------|
|           |       | Over the Scale Tons  | Wtd. Avg. Degrees Brix |                       |                        | Total Brix (Column 5 X 6)                       | Base Price Per Ton | Acceptable Brix Limits | Brix Adjustment Factors Per Degree Brix Plus and Minus * | Brix Adjustment Limits |      |      | Actual final price paid by winery to grower at each base price and Brix adjustment factor including bonuses or allowances, Dollars/Ton |           |    |              |           |                           |                            |
|           |       |                      |                        |                       |                        |   |                    |                        |  | Base                   | Max. | Min. |  |           |    |              |           |                           |                            |
|           |       |                      |                        |                       |                        |   |                    |                        |  |                        |      |      |  | 12        | 13 | 14           |           |                           |                            |
| Column →  |       | 3                    | 4                      | 5                     | 6                      | A   | 7                  | 8                      | 9  | 10                     |      |      |  | B         |    | C            | 15        |                           |                            |
| Zinfandel | 1     | 100.0                | 20.1                   | 100.0                 | 20.1                   | 2,010.00  | \$ 450.00          | 25                     | 19   | + or - 10%             | 22   | 24   | 20   | \$ 364.50 |    | \$ 36,450.00 | \$        |                           |                            |
| Zinfandel | 1     | 20.5                 | 21.3                   | 20.5                  | 21.3                   | 436.65  | 450.00             | 25                     | 19   | + or - 10%             | 22   | 24   | 20   | 418.50    |    | 8,579.25     |           |                           |                            |
| Zinfandel | 1     | 10.6                 | 23.5                   | 10.6                  | 23.5                   | 249.10  | 450.00             | 25                     | 19   | + or - 10%             | 22   | 24   | 20   | 517.50    |    | 5,485.50     |           |                           |                            |
|           |       | 131.1                | 20.6                   | 131.1                 | 20.6                   | 2,695.75  |                    |                        |  |                        |      |      |  |           |    | \$ 50,514.75 | \$ 385.31 |                           |                            |

Columns 4 and 6 were obtained by dividing the total Net Fresh Tons, (Columns 3 and 5) into the total Brix of these same tons (Column A):  $\frac{2,695.75}{131.1} = 20.6$

Column 15 was obtained by dividing the total Net Fresh Tons, (Column 5) into the total dollars paid for these same tons (Column C):  $\frac{\$50,514.75}{131.1} = \$385.31$

Table 7 shows all grape tonnage purchased as distilling material other than beverage brandy by California processors from the 1987 crop. The tonnage, weighted average degrees Brix and price per ton are shown by grape type and variety. State totals and averages for 1986 are given for comparison.

Table 8 shows base prices paid to growers by variety, by Brix adjustment factors, and percent of variety tonnage. The weighted average of all base prices by variety is not shown in this publication, but is available in summary form by contacting the Federal-State Market News Service, Sacramento, California.

The Brix adjustment factors determine adjustments to base prices to compensate for sugar variations. In this report, adjustments are expressed in dollars per ton, or percent of base price per degree variance from the established Brix base. Occasional lots are traded on price per degree Brix as delivered.

TABLE 1: STATE TOTALS BY TYPE AND VARIETY: WEIGHTED AVERAGE DEGREES BRIX\* AND WEIGHTED AVERAGE DOLLARS PER TON, 1986-87

| TYPE AND VARIETY            | AVERAGE BRIX:      |                    |             |             | AVERAGE BRIX: WEIGHTED AVERAGE: |                    |                   |             |

a/ See code descriptions beginning on page 48.

b/ Percentage total by variety will not necessarily add to 100.00 due to rounding.

c/ Less than .005 percent.

d/ Price basis per degree Brix.

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

# GRAPE CRUSH REPORT

## OVERVIEW

Information contained in this Report was supplied by processors to fulfill the reporting requirements of Section 55601.5 of the Food and Agriculture Code.

The Preliminary Grape Crush Report includes all grape tonnage crushed during the 1988 season. It also includes purchased tonnage and pricing information for grapes with final prices prior to January 10, 1989. The Final Grape Crush Report, to be released March 10, 1989, will include additional purchased tonnage and prices from reference price contracts that were in effect prior to January 1, 1977 and will be priced after January 10, 1989. The Final Report may also contain any late reports or corrections to the Preliminary Report.

Detail of the crushed tonnage, degrees Brix and weighted average prices are reported by grape type and variety as well as by grape pricing district. The 17 districts refer to the area in which the grapes were grown as defined in the Administrative Code. A district map is located on the inside of the front cover.

## GRAPE PRICES CONTINUE TO RISE

California grape growers have received an average price of \$255.97 per ton for grapes crushed in 1988, up 16 percent from the 1987 average price. The average price has rebounded by 59 percent since 1985. The 1988 price is the highest on record -- surpassing the \$249.40 price paid in 1981. No adjustments in these price levels have been made to reflect the effects of inflation.

The 1988 crush totaled 2,834,475 tons, up 14 percent from the 1987 crush but 9 percent less than the record-large 1982 harvest. White wine varieties continue to account for a larger share of all grapes crushed while raisin varieties declined.

SOURCE: GRAPE CRUSH REPORT

## LEADING GRAPE VARIETIES

French Colombard, the most widely planted grape variety in California, continued its dominance with 25 percent of the crush volume. Thompson Seedless, a raisin variety grape, remained in second place with 12 percent of the total crush. The remaining top ten varieties were all wine varieties except the fourth largest -- Flame Tokay which falls into the table grape classification.

Grapes produced in District 4 (Napa County) received the highest average price of \$982.21 per ton. District 3 (Sonoma and Marin counties) received the second highest return of \$780.68 per ton. Of the grapes grown Statewide, Chardonnay grapes received the highest average price of \$1,117.56 per ton. The average price paid for Cabernet Sauvignon grapes was \$825.42 per ton. The 1988 Thompson Seedless price was \$114.78, down 6 percent from the \$122.45 price paid last year. The crush volume of Thompson Seedless grapes declined by 12 percent from 1987 to 350,669 tons.

The Final Grape Crush Report, which will contain price updates on reference price contracts for some wineries, will be issued on March 10, 1989.

## EXPLANATION OF TABLES

**TABLE 1** is a summary of the 1988 crop State totals by grape type and varieties that are shown in detail by grape pricing districts in Tables 2 through 6. State totals and averages for 1987 are shown for comparison.

**TABLE 2** includes over-the-scale fresh tonnage of all grapes crushed by California processors from the 1988 crop. Over-the-scale fresh weight tonnage includes materials other than grapes (MOG) and defects. This table is broken down by the 17 grape pricing districts and by variety. State totals for 1987 are shown for comparison. Crushed tonnage includes all grapes crushed whether: grown and crushed by processors; purchased and crushed by processors; crushed by cooperatives, juice manufacturers, etc.; or crushed for others, including growers.

TABLE 3 shows the weighted average degrees Brix for all grapes crushed (TABLE 2) by California processors from the 1988 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 1987 are shown for comparison.

TABLE 4 includes net weight fresh tonnage of all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy by California processors from the 1988 crop. Net weight fresh tonnage does not include material other than grapes (MOG) and defects or other weight adjustments deducted from gross weight. The purchased tonnage is reported by variety and grape pricing districts. State totals for 1987 are shown for comparison. TABLE 4 does not include tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices for all tonnage shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 5 shows the weighted average degrees Brix for all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 1988 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 1987 are shown for comparison. TABLE 5 does not include degrees Brix of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 6 gives the weighted average price per ton, delivered basis, of all tonnage purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 1988 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 1987 are shown for comparison. TABLE 6 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Weighted average prices reflect final prices through January 10, 1989 and includes any Brix adjustments, bonuses or allowances. Prices from some reference price contracts written prior to January 1, 1977 may be included if settled by January 10, 1989. Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling allowances for delivery outside the area.

## LEADING GRAPE VARIETIES

French Colombard, the most widely planted grape variety in California, continued its dominance with 25 percent of the crush volume. Thompson Seedless, a raisin variety grape, remained in second place with 12 percent of the total crush. The remaining top ten varieties were all wine varieties except the fourth largest -- Flame Tokay which falls into the table grape classification.

Grapes produced in District 4 (Napa County) received the highest average price of \$982.21 per ton. District 3 (Sonoma and Marin counties) received the second highest return of \$780.68 per ton. Of the grapes grown Statewide, Chardonnay grapes received the highest average price of \$1,117.56 per ton. The average price paid for Cabernet Sauvignon grapes was \$825.42 per ton. The 1988 Thompson Seedless price was \$114.78, down 6 percent from the \$122.45 price paid last year. The crush volume of Thompson Seedless grapes declined by 12 percent from 1987 to 350,669 tons.

The Final Grape Crush Report, which will contain price updates on reference price contracts for some wineries, will be issued on March 10, 1989.

## EXPLANATION OF TABLES

**TABLE 1** is a summary of the 1988 crop State totals by grape type and varieties that are shown in detail by grape pricing districts in Tables 2 through 6. State totals and averages for 1987 are shown for comparison.

**TABLE 2** includes over-the-scale fresh tonnage of all grapes crushed by California processors from the 1988 crop. Over-the-scale fresh weight tonnage includes materials other than grapes (MOG) and defects. This table is broken down by the 17 grape pricing districts and by variety. State totals for 1987 are shown for comparison. Crushed tonnage includes all grapes crushed whether: grown and crushed by processors; purchased and crushed by processors; crushed by cooperatives, juice manufacturers, etc.; or crushed for others, including growers.

TABLE 3 shows the weighted average degrees Brix for all grapes crushed (TABLE 2) by California processors from the 1988 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 1987 are shown for comparison.

TABLE 4 includes net weight fresh tonnage of all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy by California processors from the 1988 crop. Net weight fresh tonnage does not include material other than grapes (MOG) and defects or other weight adjustments deducted from gross weight. The purchased tonnage is reported by variety and grape pricing districts. State totals for 1987 are shown for comparison. TABLE 4 does not include tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices for all tonnage shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 5 shows the weighted average degrees Brix for all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 1988 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 1987 are shown for comparison. TABLE 5 does not include degrees Brix of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 6 gives the weighted average price per ton, delivered basis, of all tonnage purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 1988 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 1987 are shown for comparison. TABLE 6 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Weighted average prices reflect final prices through January 10, 1989 and includes any Brix adjustments, bonuses or allowances. Prices from some reference price contracts written prior to January 1, 1977 may be included if settled by January 10, 1989. Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling allowances for delivery outside the area.

The following example indicates the method used for calculating weighted averages:

| Variety   | Dist. | Total Grapes Crushed |                        | Final Prices of Grapes Purchased from Grower(s) |                        |                             |                    |                        |      |  |                        |      |   |              |              |    |  |  | Total Paid (Column C) | Wtd. Average Price Per Ton |
|-----------|-------|----------------------|------------------------|---|------------------------|-----------------------------|--------------------|------------------------|------|--|------------------------|------|---|--------------|--------------|----|--|--|-----------------------|----------------------------|
|           |       | Over the Scale Tons  | Wtd. Avg. Degrees Brix | Net Weight Fresh Tons                           | Wtd. Avg. Degrees Brix | Total Brix (Column A) 5 X 6 | Base Price Per Ton | Acceptable Brix Limits |      | Brix Adjustment Factors Per Degree Brix Per Ton Plus and Minus * | Brix Adjustment Limits |      | Actual final price paid by winery to grow. at each base price and Brix adjustment factor including bonuses or allowances, dollars/Ton |              |              |    |  |  |                       |                            |
|           |       |                      |                        |   |                        |                             |                    | Max.                   | Min. |  | Base                   | Max. | Min.  |              |              |    |  |  |                       |                            |
|           |       |                      |                        |   |                        |                             |                    |                        |      |  |                        |      |   |              |              |    |  |  |                       |                            |
|           |       |                      |                        |   |                        |                             |                    |                        |      |  |                        |      |   |              |              |    |  |  |                       |                            |

| Zinfandel | 1     | 20.5                 | 21.3                   | 20.5  | 21.3                   | 436.65                      | 450.00             | 25                     | 19   | + or - 10%   | 22                     | 24   | 20  | 418.50       | 8,579.25     |    |  |  |                       |                            |
| Zinfandel | 1     | 10.6                 | 22.5                   | 10.6  | 22.5                   | 242.10                      | 450.00             | 25                     | 19   | + or - 10%   | 22                     | 24   | 20  | 517.50       | 5,485.50     |    |  |  |                       |                            |
|           |       | 131.1                | 20.6                   | 131.1   | 20.6                   | 2,695.75                    |                    |                        |      |  |                        |      |   | \$ 50,514.75 | \$ 385.31    |    |  |  |                       |                            |

Columns 4 and 6 were obtained by dividing the total Net Fresh Tons, (Columns 3 and 5) into the total Brix of these same tons (Column A):  $\frac{2,695.75}{131.1} = 20.6$

Column 15 was obtained by dividing the total Net Fresh Tons, (Column 5) into the total dollars paid for these same tons (Column C):  $\frac{\$50,514.75}{131.1} = \$385.31$

TABLE 7 shows all grape tonnage purchased as distilling material other than beverage brandy by California processors from the 1988 crop. The tonnage, weighted average degrees Brix and price per ton are shown by grape type and variety. State totals and averages for 1987 are given for comparison.

TABLE 8 shows base prices paid to growers by variety, by Brix adjustment factors, and percent of variety tonnage. Weighted average base prices are included.

The Brix adjustment factors determine adjustments to base prices to compensate for sugar variations. In this Report, adjustments are expressed in dollars per ton, or percent of base price per degree variance from the established Brix base. Occasional lots are traded on price per degree Brix as delivered.

a/ See code descriptions beginning on page 55.

b/ Percentage total by variety will not necessarily add to 100.00 due to rounding.

c/ Less than .005 percent.

d/ Price basis per degree Brix.

e/ All prices based on per degree Brix.

f/ Price per degree Brix not included in weighted average base price.

Table 8 - Supplement

## BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

# MAP & DEFINITIONS OF CALIFORNIA GRAPE PRICING DISTRICTS

1. Mendocino County
2. Lake County
3. Sonoma and Marin Counties
4. Napa County
5. Solano County
6. Alameda, Contra Costa, Santa Clara, San Francisco, San Mateo, and Santa Cruz Counties
7. Monterey and San Benito Counties
8. San Luis Obispo, Santa Barbara and Ventura Counties
9. Yolo County north of Interstate 80 to the junction of Interstate 80 and U.S. 50 and north of U.S. 50; Sacramento County north of U.S. 50; Del Norte, Siskiyou, Modoc, Humboldt, Trinity, Shasta, Lassen, Tehama, Plumas, Glenn, Butte, Colusa, Sutter, Yuba, and Sierra Counties.
10. Nevada, Placer, El Dorado, Amador, Calaveras, Tuolumne and Mariposa Counties
11. San Joaquin County north of State Highway 4; and Sacramento County south of U.S. 50 and east of Interstate 5.
12. San Joaquin County south of State Highway 4; Stanislaus and Merced Counties
13. Madera, Fresno, Alpine, Mono, Inyo Counties; and Kings and Tulare Counties north of Nevada Avenue (Avenue 192)
14. Kings and Tulare Counties south of Nevada Avenue (Avenue 192); and Kern County
15. Los Angeles and San Bernardino Counties
16. Orange, Riverside, San Diego, and Imperial Counties
17. Yolo County south of Interstate 80 from the Solano County line to the Junction of Interstate 80 and U.S. 50 and south of U.S. 50 and Sacramento County south of U.S. 50 and west of Interstate 5.

PLEASE NOTE:

BOUNDARY DESCRIPTIONS WERE CHANGED IN 1985 FOR  
DISTRICTS 9, 11, AND 17.

# GRAPE CRUSH REPORT

## OVERVIEW

Information contained in this report was supplied by processors to fulfill the reporting requirements of Section 55601.5 of the Food and Agriculture Code.

The Preliminary Grape Crush Report includes all grape tonnage crushed during the 1989 season. It also includes purchased tonnage and pricing information for grapes with final prices prior to January 10, 1990. The March 9, 1990 Final Grape Crush Report will include additional purchased tonnage and prices from reference price contracts that were in effect prior to January 1, 1977. In addition, the final report will contain any late reports or corrections to the preliminary report.

Detail of the crushed tonnage, degrees Brix and weighted average prices are reported by grape type and variety as well as by grape pricing district. The 17 districts refer to the area in which the grapes were grown as defined in the Administrative Code. A district map is located on the inside of the front cover.

## GRAPE PRICES CONTINUE TO RISE

California grape growers received an average price of \$299.39 per ton for grapes crushed in 1989, up 15 percent from the 1988 average price. The average price increased by 86 percent since 1985. The 1989 price was the highest on record -- surpassing the \$260.08 price paid in 1988. These price levels were not adjusted for inflation.

The 1989 crush totaled 2,719,682 tons, down 4 percent from the 1988 crush and 13 percent less than the record-large 1982 harvest of 3,115,531. White wine varieties continued to account for the largest share of all grapes crushed while raisin and table type varieties declined. The 1989 red wine variety crush totaled 871,279 tons, up 15 percent from 1988.

# LEADING VARIETIES CRUSHED

## 1989 CROP

PERCENT OF TOTAL CRUSH

# GRAPE PRICE PER TON

## BY TYPE OF GRAPE, 1980-89

SOURCE: GRAPE CRUSH REPORT

## LEADING GRAPE VARIETIES

French Colombard, the most widely planted wine grape variety in California, continued its dominance with 22 percent of the crush volume. Thompson Seedless, a raisin variety grape, remained in second place with 12 percent of the total crush. The remaining top ten varieties were all wine varieties except the seventh largest -- Flame Tokay which falls into the table grape classification.

Grapes produced in District 4 (Napa County) received the highest average price of \$1,149.84 per ton, up 17 percent from 1988. District 3 (Sonoma and Marin counties) received the second highest return of \$927.05, up 19 percent from 1988. Of the grapes grown Statewide, Cabernet Franc grapes received the highest average price of \$1,243.85 per ton. The average price for Cabernet Sauvignon grapes was \$1,049.05, up 28 percent from 1988. The 1989 Chardonnay price of \$1,223.84 was up 9 percent from last year, while the 1989 Thompson Seedless price of \$132.02 was up 15 percent from last year. The crush volume of Thompson Seedless grapes declined by 8 percent from 1988 to 323,439 tons.

## EXPLANATION OF TABLES

**TABLE 1** is a summary of the 1989 crop State totals by grape type and varieties that are shown in detail by grape pricing districts in Tables 2 through 6. State totals and averages for 1988 are shown for comparison.

**TABLE 2** includes over-the-scale fresh tonnage of all grapes crushed by California processors from the 1989 crop. Over-the-scale fresh weight tonnage includes materials other than grapes (MOG) and defects. This table is broken down by the 17 grape pricing districts and by variety. State totals for 1988 are shown for comparison. Crushed tonnage includes all grapes crushed whether: grown and crushed by processors; purchased and crushed by processors; crushed by cooperatives, juice manufacturers, etc.; or crushed for others, including growers.

TABLE 3 shows the weighted average degrees Brix for all grapes crushed (TABLE 2) by California processors from the 1989 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 1988 are shown for comparison.

TABLE 4 includes net weight fresh tonnage of all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy by California processors from the 1989 crop. Net weight fresh tonnage does not include material other than grapes (MOG) and defects or other weight adjustments deducted from gross weight. The purchased tonnage is reported by variety and grape pricing districts. State totals for 1988 are shown for comparison. TABLE 4 does not include tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices for all tonnage shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 5 shows the weighted average degrees Brix for all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 1989 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 1988 are shown for comparison. TABLE 5 does not include degrees Brix of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 6 gives the weighted average price per ton, delivered basis, of all tonnage purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 1989 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 1988 are shown for comparison. TABLE 6 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Weighted average prices reflect final prices through January 10, 1990 and include any Brix adjustments, bonuses or allowances. Prices from some reference price contracts written prior to January 1, 1977 may be included if settled by January 10, 1990. Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling allowances for delivery outside the area.

The following example indicates the method used for calculating weighted averages:

| Variety   | Dist | Total Grapes Crushed        |                        | Wet Weight Fresh Tons | Final Prices of Grapes Purchased from Grower(s) |                    |                        |      |   |                        |  |      |      |                             |             |    | Wtd. Average Price Per Ton |
|-----------|------|-----------------------------|------------------------|-----------------------|---|--------------------|------------------------|------|---|------------------------|--|------|------|-----------------------------|-------------|----|----------------------------|
|           |      | Over The Scale Degrees Brix | Wtd. Ave. Degrees Brix |                       | Wtd. Avg. Degrees Brix (Column 5 x Column 6)    | Base Price Per Ton | Acceptable Brix Limits |      | Brix Adjustment Factors Per Degree Brix Plus or Minus | Brix Adjustment Limits | Actual Final Price Paid By Winery to Grower at Each Base Price and Brix Adjustment Factor Including Bonuses or Allowances, Dollars/Ton |      |      | Total Paid Columns (\$ x B) |             |    |                            |
|           |      |                             |                        |                       |   |                    | Min.                   | Max. |   |                        | Base   | Min. | Max. |                             |             |    |                            |

| Zinfandel | 1    | 10.6                        | 23.5                   | 10.6                  | 23.5  | 249.10             | \$50.00                | 19.0 | 25.0  | + or - 10%             | 22.0   | 20.0 | 24.0 | 517.50                      | 5,485.50    |    |                            |
| Combined  | 1    | 131.1                       | 20.6                   | 131.1                 | 20.6  | 2,695.75           | \$50.00                | 19.0 | 25.0  | + or - 10%             | 22.0   | 20.0 | 24.0 | \$50,514.75                 | \$385.31    |    |                            |

Columns 4 and 6 were obtained by dividing the total Net Fresh Tons, (Columns 3 and 5) into the total Brix of these same tons (Column A):  $\frac{2,695.75}{131.1} = 20.6$

Column 15 was obtained by dividing the total Net Fresh Tons, (Column 5) into the total dollars paid for these same tons (Column C):  $\frac{\$50,514.75}{131.1} = \$385.31$

TABLE 7 shows all grape tonnage purchased as distilling material other than beverage brandy by California processors from the 1989 crop. The tonnage, weighted average degrees Brix and price per ton are shown by grape type and variety. State totals and averages for 1988 are given for comparison.

TABLE 8 shows base prices paid to growers by variety, by Brix adjustment factors, and percent of variety tonnage. Weighted average base prices are included.

The Brix adjustment factors determine adjustments to base prices to compensate for sugar variations. In this report, adjustments are expressed in dollars per ton, or percent of base price per degree variance from the established Brix base. Occasional lots are traded on price per degree Brix as delivered.

a/ See code descriptions beginning on page 55.

b/ Percentage total by variety will not necessarily add to 100.00 due to rounding.

c/ Less than .005 percent.

d/ Price basis per degree Brix.

e/ Price per degree Brix not included in weighted average base price.

f/ All prices based on per degree Brix.

Table 8 - Supplement

## BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.
